Skewness

- Skewness

pandas.DataFrame.skew

- -0.5 to 0.5 → Symmetric
- Less than -0.5 → Negatively skewed
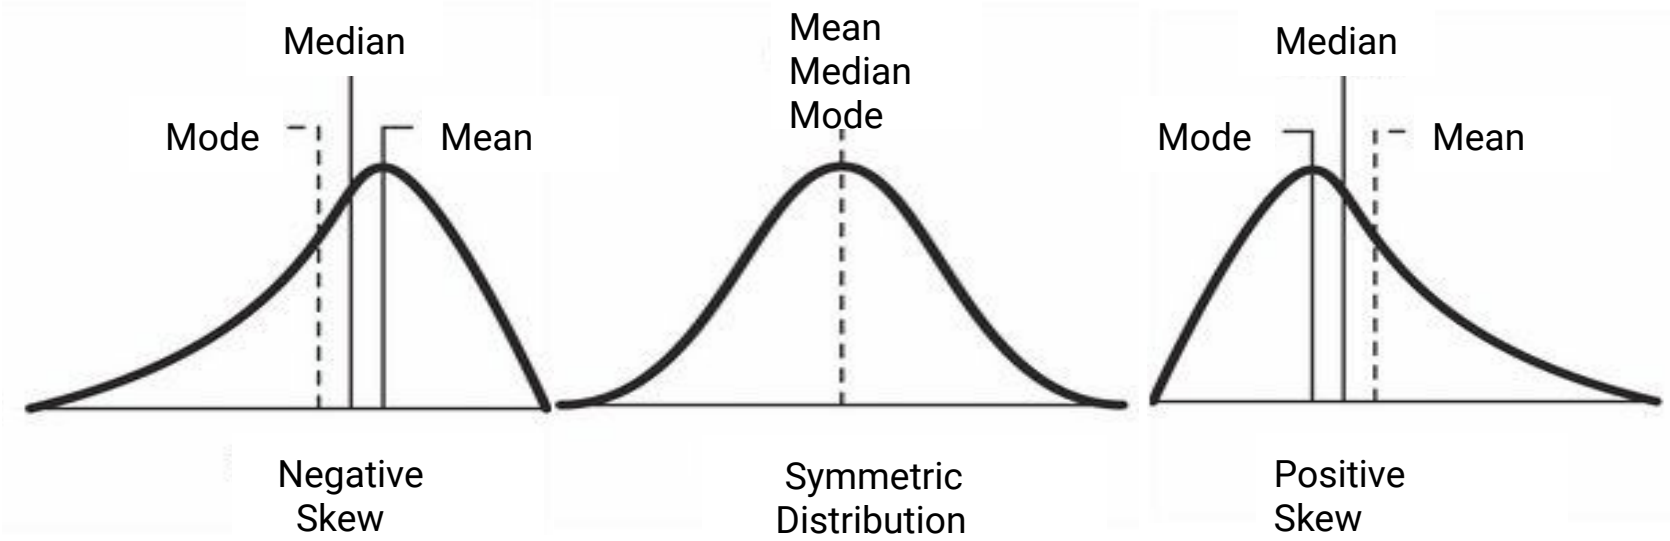
- Greater than 0.5 → Positively skewed

Skewness

- Skewness
- -0.5 to 0.5 → Symmetric
- Less than -0.5 → Negatively skewed
- Greater than 0.5 → Positively skewed



Kurtosis

- Kurtosis gives an idea of the tails of a distribution.

Kurtosis

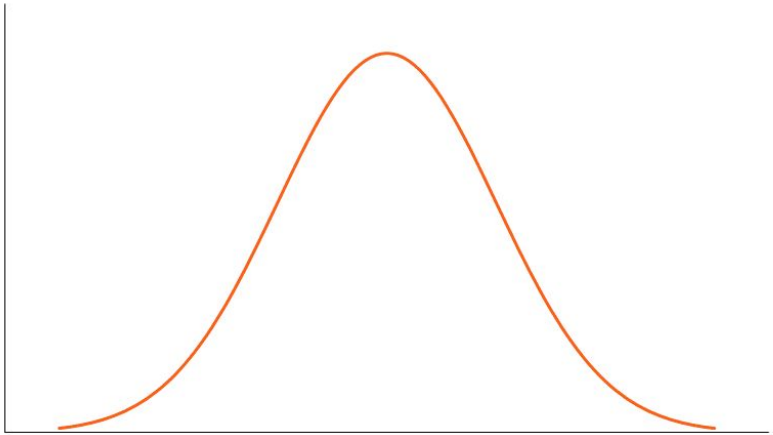
- Kurtosis gives an idea of the tails of a distribution.
  - Symmetric

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
  - Symmetric:
    - K=0 (*Mesokurtic*)
    - Tails similar to normal distribution

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
  - Symmetric:
    - K=0 (*Mesokurtic*)
    - Tails similar to normal distribution



Kurtosis

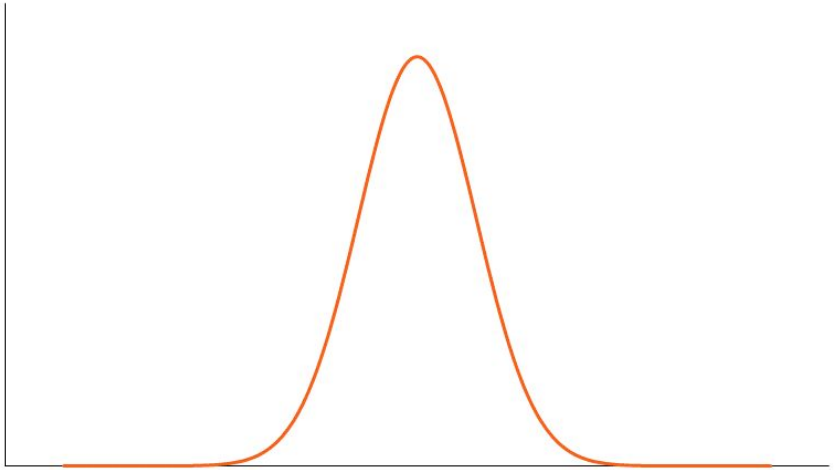
- Kurtosis gives an idea of the tails of a distribution.
- High Presence of extreme values.

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
- High Presence of extreme values.
  - K>0, (*Leptokurtic*)
  - Longer distribution, fatter tail

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
- High Presence of extreme values.
  - K>0, (*Leptokurtic*)
  - Longer distribution, fatter tail



Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
- Low Presence of extreme values.

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
- Low Presence of extreme values.
  - K<0, (*Platykurtic*)
  - Shorter distribution, thinner tail.

Kurtosis

- Kurtosis gives an idea of the tails of a distribution.
- Low Presence of extreme values.
  - K<0, (*Platykurtic*)
  - Shorter distribution, thinner tail.
